

Features & Benefits

The range of MarineTuft Carpet was established to cater for people looking for a comfortable and high grade carpet that could withstand nature's elements. Each variant of our tufted carpet range has been constructed from the highest quality UV treated fibres, coupled with specialist **HydraBak** marine grade polymer backing adhesives to ensure they stand up to the rigors of external use, such as sunlight and moisture.

For a tough durable product these carpets are remarkably soft and comfortable, making them suitable for any exterior or interior use on boats, pontoons, private aircraft, trains, caravans and almost any recreational vehicle or vessel - including home decks and patios.

- Cut pile and cut / loop pile styling
- Soft comfort underfoot
- Easier to clean than conventional needle punch carpets
- Available in 4m and/or 2m widths (+/- 0.5%) to suit most installations
- High resistance to snagging from hooks and lures
- Can either be loose laid or adhered to the sub floor
- Constructed from the highest quality UV resistant fibres
- Mould and mildew resistant for hygiene and maintenance
- Good sound absorption qualities

Marine All Weather Carpet Specifications

Product specifications:

Standard range tufted from 100% marine grade solution dyed polypropylene BCF fibres with maximum UV inhibitors added and premium colour stabilization material used during extrusion. Primary backing is marine grade UV stabilized polypropylene woven cloth with specifically developed adhesives for tuft locking cut and loop pile. Secondary backing is marine grade polypropylene woven cloth with specifically developed adhesives bonding primary and secondary.

Total Standard Weight: approx 1.4Kg per sq mtr (+/-10%)

Wear Rating: Marine/Domestic - Heavy Duty
Commercial - Light Duty

Test Standards: - Fire Test ASISO 9239.1

- Accelerated Exposure to UV / light SAE-J1960-2004
- Automotive light fastness test SAE-J1885
- Color fastness to salt water AS2001.4.E02(AS ISO105.E02)
- Color fastness to light ISO 105.B02
- Color fastness to chlorine AS2001.4.11

Installation Information

Loose Laying:

The **HydraBak** feature makes this product very stable. Loose laying can be achieved by cutting to shape and laying down in the desired area, much like a door mat. However, we recommend the carpet be edged (bound or overlapped) and fixed to the floor with press-studs. Any large or multiple width loose lay installations should be referred to your local installation trimmer for further advice.

Direct Adhering:

This carpet can be easily adhered to most sub floors by cutting to shape and fixing to the floor with either a suitable contact or glue. For internal gluing, we recommend using UZIN KE 2000 S NEW adhesive (www.uzin.co.nz) and for external gluing, we recommend using ROBERTS 6037 adhesive. Over locking or edge binding is also recommended but not essential for this method. Additionally, some sub floors may require extra preparations prior to carpet adhesion. Please refer to your local installation marine trimmer for further advice.

Limited Warranty:

Marine Tuft has taken every step to ensure this carpet is of the

highest possible quality including having the finished product rated by a leading Australian based textile testing facility (AWTA). AWTA provides results on a 1 to 8 scale where 8 is the maximum attainable. Marine/outdoor carpet manufactured by Marine Tuft has attained a rating of 7 – 8 for resistance to UV Degradation, Colour Retention and exposure to Salt Water. It is possibly the highest rated Polypropylene carpet available. However, Australian marine/outdoor conditions are regarded as some of the harshest in the world and no conditioning will completely prevent some reaction to constant exposure to direct sunlight. Some colour change should be expected if these conditions are to be endured. This product is resistant to staining from most materials. Whilst direct exposure to the sun will have little effect on the pile, the product will not withstand heat in excess of 150°C, either from direct application or radiation. Claims where the yarn has clearly melted from excessive heat from any source will not be accepted.

The product warranty covers excessive wear, UV degradation, and excessive fading as well as manufacturing defects. Claims for failure of the product to meet our expectations in these respects will be dealt with by supply of replacement carpet only. No other cost associated with the replacement of the product will be accepted by Marine Tuft Pty Ltd via Marine Tuft UK Ltd. In all warranty matters Marine Tuft reserves the right to accept or deny claims or vary the amount of any accepted settlement regardless of circumstances. Marine Tuft also reserves the right to inspect any product which is the object of a claim prior to accepting that claim as valid.

Warranty Period

Marine Tuft will warrant carpet installed by accredited persons for a period of 2 years from date of purchase and in accordance with provisions set out in this document.

Claims

All claims must be processed back through the original chain of supply and be supported by the relevant invoicing and customer receipt for purchase. Marine Tuft may require a sample of the faulty product such that research can be carried out to prevent future occurrences of any product fault.

Precautions

Strong chemicals, acids and petroleum may affect the appearance of the product.

Cleaning and Maintenance

There are two alternative methods of maintaining these carpets depending mainly on whether the material is wet or dry and as all carpets should be maintained on a regular basis.

Dry Method: If the material is dry, the best way to maintain the carpet is to vacuum it, preferably with a power head vacuum or a normal suction vacuum, as this will remove any dirt or foreign matter from the product. Preferably a power head vacuum as it will lift the pile of the carpet ensuring a longer life-span. (In loose situations periodically the backing and sub floor should also be vacuumed).

Wet Method: If a wet/hosing method is desired, a quick hose off with fresh water will generally keep the carpet clean. Periodically the carpet should be maintained by using a solution of warm water and mild household detergent. First, soak the carpet with the solution for a few minutes, then rinse thoroughly with clean water on both front and back of the material. (**Important:** when using wet method, carpet should be left in open air to dry).

Stain Removal: Depending on the application, it is always important to act quickly to remove stains efficiently in the preceding manner.

If carpet is able to be wet, use some mild household detergent or very mild bleach solution and water, then lightly rinse thoroughly with clean water.

If carpet cannot be wet, use either a branded carpet spot cleaner (as directed) or the above method, which once rinsed should be dabbed with a clean dry rag to remove excess water.

Marine Carpets

Colour Fast with UV, Mould and Mildew Resistance

For a tough durable product MarineTuft Carpet is remarkably soft and comfortable underfoot, making them suitable for all exterior or interior applications ... on boat decks or home decks and patios, and around poolsides. Also ideal for pontoons, pontoon boats, caravans, private planes and helicopters as well as almost any recreational vehicle or vessel.

- Soft underfoot and good sound absorption qualities
- Mould and mildew resistant for hygiene & maintenance
- Can either be loose laid or adhered to the sub floor

- Unique **HydraBak** backing allows water to flow through & drain away for faster drying; Reducing risk of osmosis
- Tufted for greater strength, better durability and to avoid snagging by fishing line hooks and lures
- Blood and chlorine resistant makes them easier to clean than conventional needlepunch carpets with just a simple hose down in most cases
- Available in 4m and 2m widths
- Australian made quality with stock warehoused in Europe for prompt delivery

MarineTuft Carpet is manufactured in Australia by Marine Tuft Pty Ltd, the world's largest exporter of tufted teak deck look carpet for marine use.

MARINETUFT® CARPET

DECKS

10 POPULAR COLOURS

COLOUR FAST & UV RESISTANT

Water on carpet is no longer a problem with our tough, UV resistant, carpet that is 100% water friendly. In fact, when laid correctly, water just flows through it. No mould, no mildew, and cleaning is as simple as a hose down. See details on our unique *HydraBak* backing.

MarineTuft Carpet provides a safe and comfortable under foot carpet in a range of colours that have proven themselves in the boating industry for over 10 years.

TUFTED FOR GREATER STRENGTH & BETTER DURABILITY

Unlike most cheaper, low quality woven marine carpets, all MarineTuft Carpet is manufactured using the superior tufting technique.

WORLD'S LARGEST EXPORTER OF TEAK CARPETS FOR MARINE USE

Experience counts. As the world's largest exporter of tufted teak deck look carpet for marine use, Marine Tuft has supplied products to boat owners around the world through our marine trade partners in over 20 countries. Marine Tuft now warehouses the most popular colours in the Europe for faster local delivery.

UNIQUE HYDRABAK BACKING

Only MarineTuft Carpet is backed with the blue acrylic latex *HydraBak*. *HydraBak* is designed to be porous, so water drains away making the inbuilt mould inhibitor most effective with all MarineTuft Carpet. *HydraBak* enables superior water evaporation and air flow for faster drying which helps to prevent mould and mildew, and to minimise any moisture trapped under the carpet which could cause osmosis damage.

WET AREAS

CHLORINE RESISTANT

MarineTuft Carpet is made from chlorine resistant yarn, making our carpets ideal for use around swimming pools and other wet areas. The photos below show our Teak Black carpet installed around a high school swimming pool. It was laid in 2012 and now in 2019 it still looks as good as the day it was laid.
